

How to Handle and Clean for BRAVIA 9II (65", 75" and 85")

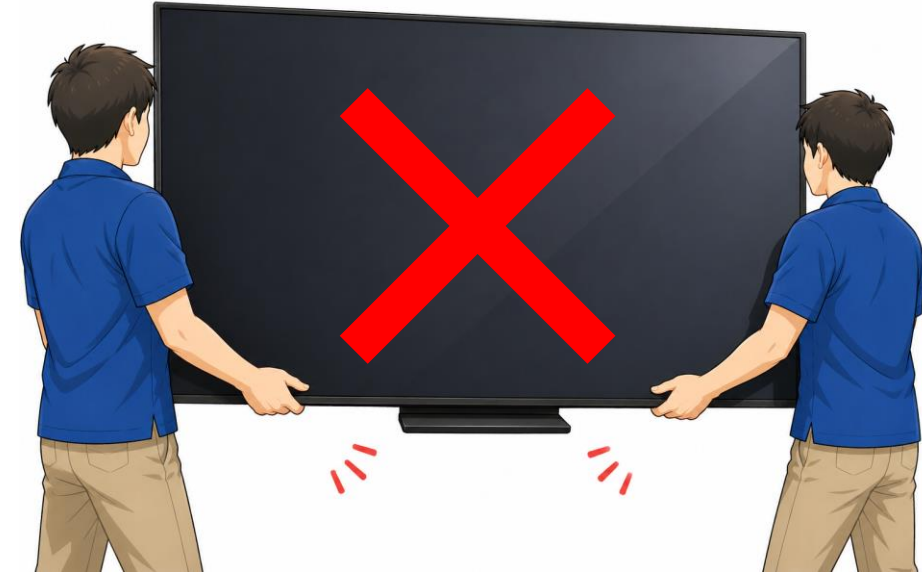

✕ Excluding 115"

[BRAVIA 9II] Important Retail Handling Precautions for BRAVIA 9II

Please wear gloves when installing or moving BRAVIA 9 II in stores.

DO : Wear gloves when moving BRAVIA 9II

DON'T : Move BRAVIA 9II with bare hands

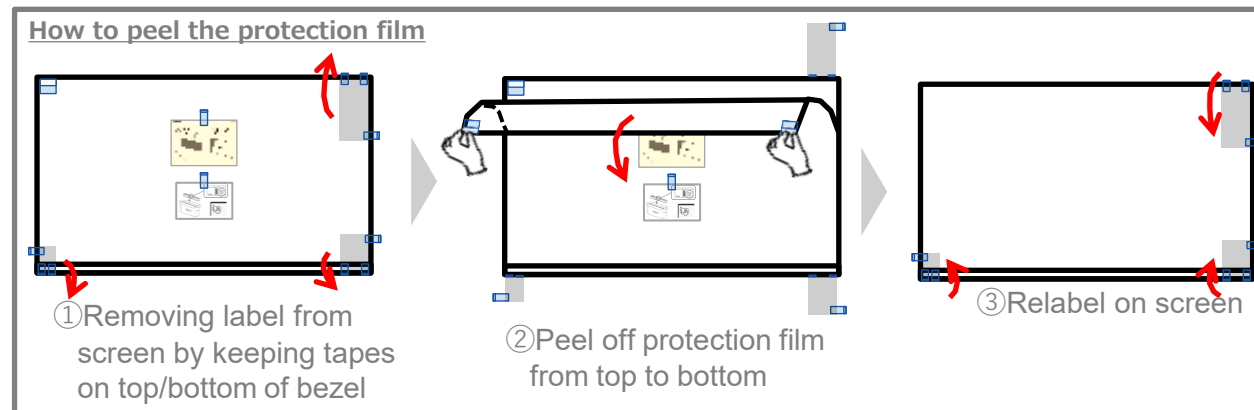

Especially when using professional installers, please strongly encourage them to wear gloves.

**No Screen surface damage and dirt while transporting and using,
Please note the following treatments.**

1) Protection film on panel screen

We will attach a protection film to the screen surface before shipment, and users/dealers are requested to peel this film before use.

→ Please peel the film **off from top to bottom**. (same way as BRAVIA 8II)

[BRAVIA 9II] How to clean BRAVIA 9II (65", 75" and 85")

**No Screen surface damage and dirt while transporting and using,
Please note the following treatments.**

2) How to remove dirt after peeling off the protection film

- Firstly, do **NOT** touch the screen surface **with bare hands**.
do **NOT** apply **any sticker tape** on the screen surface.
- While displaying the products, if some dirt or residue gets on the screen,
gently wipe it with a microfiber cloth immediately
(If cleaning is delayed, the dirt may become difficult to remove.)

For fingerprints or oil from hands on the screen, follow these steps:

1. Gently wipe the screen with a dry microfiber cloth
2. If the marks cannot be removed, wipe the screen with a microfiber cloth moistened with water
3. If the marks still cannot be removed, wipe the screen with a microfiber cloth moistened with 70% isopropyl alcohol (a.k.a. isopropanol or IPA*).

※Do **NOT** use **detergent with abrasives** such as a cleanser.

[BRAVIA 9II] Which isopropyl alcohol do I need to prepare?

Rubbing Alcohol 70% IPA
Isopropanol Alcohol - Pure
Chem (White) 1L

**Rubbing/Isopropyl alcohol is recommended
(No additional additives)**
